Dear Members of the FCG board,

On behalf of the students in English 306, thank you for your support and guidance through the difficult process of organizing, marketing, and fundraising for FCG. Given that most students in English 306 had little to no experience with a project of this scale and organization, you could've held reasonable concerns over student involvement affecting how the FCG could successfully meet its goals. Instead, you trusted our class in your efforts to help promote your goals for the community and beyond. In turn, this gave us the confidence to collaborate with you and other organizations across campus. Your willingness to share various amounts of data, planning, and professional insights helped our class provide impactful work towards promoting FCG.

Your accessibility extends not only to one English class but to the greater community you serve. If the gratitude of our entire class is not enough, there exists an entire community of community gardeners who thank you for helping them access to healthy, fresh, affordable food. Through your efforts, these gardeners are gaining better access to local, fresh food. We trust that the accessibility of local food will trickle down to the next generation of families.

Thank you for collaborating with our class, and for promoting a fairer and healthier world.

With sincere and absolute thanks,

The English 306 Professional Writing Team
