Beth,

I just have a quick question about attaching photos to Facebook posts. I'm trying to craft a post about all of the different ways to give with the poster attached, however, the poster keeps coming up very blurry. Do you know of any way that I can reformat the image so that it appears clearly?

Thanks,

Hanna

Hi Hanna!

YES I totally do! Do you know how to save the PDF of the poster as an image (PNG or JPEG)? That will make things clear. If you don't - don't worry, I'll create a folder with all the things that we have graphically speaking as JPEGS or PNG files for you to use just let me know and I can have that for you tomorrow!

Thanks a bunch! Never hesitate to reach out.
